evolving food

Healthy eating is having a major impact in the industry.

Caterers and consumers alike are spending far more time examining their food, questioning its nutritious values, and looking for a healthier option.

At Kerry Foodservice, we've done most of the hard work for you.

We know that healthy eating is far more than just a fad - after all, we've been producing health-conscious products for several years now.

We've worked hard to create a range of products ideally suited to the healthcare industry that deliver quality, balance and nutrition time after time.

We've worked equally hard to produce a separate range of low sugar and low calorie items, suitable for customers with diabetes, and diners just after a healthier option.

Applefords

Kerry Foodservice's exclusive Applefords brand places a healthy emphasis on high calibre ingredients ideal for all ages, and all catering environments.

From schools and hospitals through to restaurants and nursing homes, the products offer something for everyone. And as they all taste so good, customers can't even tell they're eating a healthier option.

The range of store cupboard essentials available include Low Calorie Squashes, Reduced Sugar Jams, Jelly and Fruits in Water.

Lucas

At Kerry Foodservice, we've worked closely with nutritionists and healthcare caterers to produce a range of products suited to their needs.

Our selection of Cook Freeze/Cook Chill products – available under the Lucas brand name – deliver nutrition and convenience to the healthcare industry.

To cater specifically for the demands of this sector, the products are all available as Cold Water Thickening Mixes (CWT), which enable caterers to quickly create dishes that can be frozen or chilled, stored as necessary and re-heated without any loss of flavour.

Key products include our Good Health Soup Mixes, CWT Sauce Mixes (including Tomato, Bechamel and Cheese Sauce), CWT Gravy Mixes, a classic CWT Custard Mix and a tasty Potato Topping Mix.

caterers can't afford to miss out on healthier dining

At Kerry Foodservice, we've been aware of that for several years. In fact, we developed a portfolio of different products that hold nutrition and flavour in equal measure well before healthy eating started dominating the headlines.

Not only does our range answer caterers' needs, it also answers the growing demands of government bodies.

In fact, you'll find most of our health-conscious products have been answering those demands for quite some time now.

- An extensive range of products to suit hospitals, nursing homes, schools and even restaurants wherever healthy eating is paramount
- Reduced sugar jams with a full fruit content of 45%, and just 30-35% sugar
- Cold Water Thickening Mixes ideal for Cook Freeze/Cook Chill dishes and great for use in Central Processing Units.
